OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
<u>pink salmon</u>	<u>9/11/93</u> 40,000 dead/spawned carcasses 10,000 live	<u>x</u>		<u>x</u>	<u>x</u>
<u>chum salmon</u>	<u>9/11/93</u> 300 dead/spawned carcasses	<u>x</u>		<u>x</u>	<u>x</u>
<u>coho salmon</u>	<u>9/11/93</u> 500 live	<u>x</u>		<u>x</u>	<u>x</u>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Boat & foot survey 9/11/93 - Stream surveyed 500' upstream of estuary. Carcasses in estuary/tide flat were a couple of feet deep in places. Many of the remaining 10,000 pinks were in poor shape, although a couple thousand of the pinks were bright and in good shape. The cohos were all bright.
